

Web Programming – Introduction Worksheet

Altınbaş University – Department of Software Engineering

Instructor: Asst. Prof. Dr. Fatma Kuzey Edeş Hoyal

Student Name: _____ **Student ID:** _____

Question 1 – Conceptual

Answer the following questions briefly and clearly:

- a) What is HTML? What is it used for?
- b) What is CSS? Why do we use CSS?
- c) Explain the difference between **block** and **inline** elements.
- d) What is the purpose of the `<a>` and `<img>` tags?

Question 2 – Practical HTML Exercise

Write a complete HTML file that creates a simple personal webpage with the following:

- A main heading with your name.
- A short paragraph describing yourself.
- A clickable link to your favorite website.
- An image.
- A list of your hobbies.

Save the file as `index.html`.

Bonus (Optional): Use simple CSS to change text color and center the heading.

Good luck!
